FOREWORD

Congratulations on the purchase of your new fork shield for forklift. This fork shield for forklift has been manufactured from high-quality materials especially for durable and reliable use. For your own safety and to ensure correct operation of the fork shield for forklift, please read and observe these operating instructions before using the fork shield for forklift. Keep these operating instructions in a safe place.

Check the item for transport damage. Damaged fork shield for forklift must not be used. In accordance with the German Road Traffic Licensing Regulations StVZO ° 30c (1), the fork shield for forklift is required to cover the forks during empty runs in public traffic. It serves as a preventive measure to increase workplace and personal safety and to minimize potential damage to goods and operating equipment.

Improper handling may result in injury or damage to the forks. SolidHub is not liable for damage resulting from improper use of the fork shield for forklift or failure to observe the specifications and rules of conduct in these assembly and operating instructions. The operator / user must ensure the correct use of the fork shield for forklift by trained and authorized personnel.

SAFETY INSTRUCTIONS

It is important that the use of fork shields for forklift and other safety devices complies with the relevant national workplace guidelines and the applicable safety standards.

- Ensure that there are no persons or obstacles in the danger zone.
- Observe the information in the technical data sheet.
- The fork blade may only be used by qualified and authorized personnel.
- Modifications and alterations to the device not authorised by the manufacturer will invalidate the warranty.
- Comply with all instructions applicable to your fork shield for forklift also observe all rules and regulations relating to work safety.
