OPERATION INSTRUCTION

| No. | Button |
|-----|-------------|
| 1 | Button S |
| 2 | Button 1 |
| 3 | Button 2 |
| 4 | Button 3 |
| 5 | Up button |
| 6 | Down button |

OPERATION

When the 'up'  button is pressed, the desk moves up and stops when the button is released.

When the 'down'  button is pressed, the desk moves down and stops when the button is released.

RESET

The desk must be reset in the following cases:

- Prior to its first use
- If the table is asymmetrical
- If the LED display shows an incorrect reading for the height

Press the down key  until the LED display shows „RES“. The table will return to the lowest displayed height. Release the button to end the reset.

SAVING HEIGHTS

Using buttons  –  on the control panel, up to three different heights can be saved. The saved height will be retained even if the desk is switched off.

1. Press the 'up'  or 'down'  button to select the desired height.
2. Press the  button; the display will then flash for 5 seconds.
3. Within these 5 seconds, press one of the three memory buttons (,  or .

RECALL MEMORY POSITION

Press and hold the Up  or Down button  until the desired position is reached or press the Memory buttons  –  to automatically move the console to the preset position.

MENU NAVIGATION

Press and hold the  button for 5 seconds to access the Menu, then press the  button again to view the Menu Guide.

The individual menu items are accessed using the arrow buttons. To go deeper into the menu or to confirm an entry, always press the  button. To exit a menu, press .

SETTING THE LOWER LIMIT OR UPPER LIMIT

In the menu under „SH“ the lower or upper limit can be set.

L - Minimum setting height

H - Maximum adjustment height

0 - No adjustment made

Use the up  or down key  to set the minimum or maximum height. The setting is completed by pressing the  button again.

SETTING OF THE HEIGHT INDICATION (CM / INCH)

Press and hold the  button for 5 seconds to access the menu, then press the  button again to view the menu guide.

In the menu field „Un“ the display unit (Si = cm & In = inch) can be changed. You can change the settings using the Up  or Down key . The following is saved by pressing the  button again.

SETTING THE ANTI-COLLISION SENSITIVITY

The sensitivity can be set in the menu under CF.

Off - Function disabled > is not recommended!

Low - Sensitivity low

Normal - Sensitivity normal

High - Sensitivity high

Confirm the setting by pressing the  button.

SWITCH TONES ON AND OFF

The beep sound can be switched on or off via the menu item bEE. Confirm the entry by pressing the  key.

DISPLAY BRIGHTNESS

Via „br“ the brightness can be selected between low, normal and high. Confirm the entry by pressing the  key.
